EXPERIENCE

This is part of the UI Design process to front end development

## University Academi Information System

Result

This is a redesign of the layout and user interface of the academic information system. Material design is applied in this development.

Problem

Web layout that is not reposnive when accessed via mobile. Page layout and size are not consistent in the old system.

Online Ordering (OTS)

This is website as the identity of a shop selling home food (stails) to reduce the queque og buyers can order throught the website directly.
